PROFILE

Creative web developer with a strong understanding of front-end technologies, including HTML, CSS, and JavaScript. Recently completed training in web development with Great Learning, building hands-on projects to sharpen skills. Adept at turning design concepts into fully functional websites. Passionate about improving user experience and optimizing performance. Ready to leverage skills and enthusiasm to make an impact in a web development role.

WORK EXPERIENCE

Web Development Traning   2024

Great Learning Academy On July 2024

Front End Development -HTML

- Specialized in HTML5 for building well-structured, accessible, and responsive websites.
- Hands-on experience with HTML tags, forms, and semantic web design principles.
- Applied the knowledge in projects to enhance web page structure and content accessibility.

Personal Project   2024 - 2025

E-learning Website (WordPress & Hostinger Deployment)

- Designed and developed an e-learning website using WordPress, focusing on an intuitive user experience and responsive design.
- Integrated LMS (Learning Management System) plugins such as LearnDash and Tutor LMS to create an interactive course system.
- Customized the website theme using HTML, CSS, and the WordPress Customizer to match the brand identity.
- Set up and configured a payment gateway (PayPal) for course purchases and subscriptions.
- Deployed the website on Hostinger with full domain management and SSL configuration to ensure a secure user experience.
- Optimized the website for SEO and mobile responsiveness to enhance search engine visibility and improve user engagement.
- Maintained site performance by regularly updating plugins, themes, and performing backups.
